

PEASE POND

Wilton, Franklin County
U.S.G.S. Wilton, Maine (7½')

Fishes

Brook trout
Smallmouth bass
Largemouth bass
White perch
Yellow perch
Chain pickerel

Minnows
Golden shiner
Fallfish (chub)
White sucker
Hornpout (bullhead)
Redbreast sunfish
American eel

Physical Characteristics

Area - 107 acres

Maximum depth - 19 feet

Temperatures:

Surface - 76°F

18 feet - 70°F

Principal fisheries: Largemouth bass, white perch, and chain pickerel

Pease Pond is located east of Wilson Pond. A small inlet enters the south end of the pond and its outlet flows northeast into Wilson Stream. The pond's shoreline is mostly developed.

Water quality in Pease Pond is poor for coldwater gamefish. Small populations of brook trout survive in the inlet and outlet and move into the pond seasonally. Warmwater fish provide good angling opportunity with largemouth bass and white perch growing to attractive sizes. The pond is not stocked.

Pease Pond lacks public access with the entire shoreline being private property. The pond is open to fishing under general law in both the summer and winter seasons. See the lawbook for additional regulations.

Surveyed - June, 1975

Resurveyed - 1993
